## **Sub:- Regarding field testing of Fibershot Micro FTTx OTDR (Model-M3690)**

**Ref:- Letter No.- Micro-Test dated:- 10.10.2018**

In reference to the letter from M/s Star Infomatic Pvt. Ltd. dated 10.10.2018 received from DGM(T-C) regarding field testing of Fibershot Micro FTTx OTDR(Model-3690), this office has tested this Micro FTTx OTDR(Model-3690) in the field and the points of observations are as follows:-

1. Equipment is handy with rechargeable battery.
2. Equipment is inbuilt battery operated, suitable for field use.
3. Equipment is having multiple features like OTDR, Optical power meter, Optical PON power meter and VFL for testing and maintenance of optical fiber cable network with limited length of fiber cable.
4. Equipment is having multiple features like LTDR, Line test, underground line search at limited depth for testing and maintenance of copper cable network with limited length of copper cable.
5. Equipment is having multiple features like Ping test, speed test for testing and maintenance of IP network.

As per the above observations this instrument is recommended for testing/ maintenance of optical fiber cable network and copper cable network.

  
SDE(Tx-JP)
